

QUADCO REGIONAL TRANSPORTATION PLANNING ORGANIZATION

Application for SFY12/13 UPWP Transportation Planning Project Funding

**Due: 3:00 p.m. March 18, 2011 - To Be AT LEAD AGENCY (not postmarked)**

**Applications can be submitted by single signed hard copy by mail, OR signed copy (signature in colored ink) scanned in PDF format and submitted by email to: [dpohle@co.grant.wa.us](mailto:dpohle@co.grant.wa.us)**

**Applications must be Signed by Appropriate Agency Representatives**  
**(NO Faxed Copies shall be accepted)**

Agency Name: City of Othello

Project Name: Main Street Improvement Study

Road/Street Name: Main Street

Location Map Included  Yes  No

**PROJECT DESCRIPTION**

PROVIDE A BRIEF DESCRIPTION OF YOUR PROJECT INCLUDING WORK ITEMS ANTICIPATED AND TIMELINES FOR COMPLETION.

Study the requirements for needed system operations including the sound, safe and effective movement of pedestrians and vehicles in and along Main Street in a logical and organized fashion. To include:

- ◆ Lighting
- ◆ Walk to School plan
- ◆ Walk to Business plan
- ◆ Economic Banners

Timeline: If selected, the project would be completed within six months of contract award.

**Total Project Cost:** \$ 9,500

**BENEFITS TO REGIONAL SYSTEM**

Transportation System Operation and Safety

1. HOW DOES THE PROPOSED STUDY PROVE TO BENEFIT IN THE SOUND, EFFECTIVE, AND SAFE OPERATION OF THE TRANSPORTATION SYSTEM?

1 (a) Lighting Needs:

- ◆ Safety – Walk to school plan
- ◆ Movement of pedestrians
- ◆ Parking
- ◆ Driveways (Business)
- ◆ Consistent lighting
- ◆ Bicycle riding
- ◆ Safety of young mothers with strollers

1 (b) Trees:

- ◆ Vehicles and pedestrians calming
- ◆ Safety pedestrians barriers to keep them farther from the curb

1 (c) Banners – announcing economic activities

1 (d) Traffic signals - safety

1 (e) Existing business improvements

1 (f) Improve new business climate

1 (g) Attractive facelift to enhance job retention and solicit new business

1 (h) Visible walking path through downtown will attract more tourists to downtown

Supporting Livable Communities

2. HOW DOES THE PROPOSED STUDY PROVE TO BENEFIT THE TRANSPORTATION INFRASTRUCTURE NEEDS OF THE REGION'S MAJOR SOURCES OF ECONOMIC DEVELOPMENT?

Tourism:

- ◆ Sandhill Crane Festival
- ◆ Fair and Rodeo
- ◆ Fiesta Amistad
- ◆ 4<sup>th</sup> of July
- ◆ And 15 other local events

Enhanced Mobility

3. Will lead to greener community through the reduction of greenhouse emissions and reducing carbon footprint:
- ◆ Safer/easier traffic to shopping areas
  - ◆ Lights for safety
  - ◆ Walkways to downtown
  - ◆ Encourage walking

Investment Value, Local Support, Multi-jurisdictional Coordination, & Partnerships

4. HOW DOES THE PROPOSED STUDY DEMONSTRATE A COST-EFFECTIVE MANNER TO ACHIEVE A VIABLE SOLUTION TO A POTENTIAL OR RECOGNIZED PROBLEM? (ATTACH LETTERS OF LOCAL SUPPORT, COLLABORATIVE DECISION MAKING BETWEEN JURISDICTIONS AND PARTNERS, AND HOW THE STUDY COSTS WILL BE USED TOWARDS THE REGIONAL TRANSPORTATION PLAN. LIST SOURCES OF ALL FUNDS THAT WILL BE USED, INCLUDING THOSE FROM PARTNERSHIPS).

Problem:

- ◆ Safety of pedestrians
- ◆ Slow economic base
- ◆ Visually non-pleasing
- ◆ ADA compliant

Resolution:

- ◆ Lighting will enhance safety of both pedestrians and vehicles
- ◆ Increased economic base as better visibility to local business and Port will be encourage to contribute dollars because it ties to economic development
- ◆ ADA ramps added
- ◆ City and School District's sidewalk plans will tie into and enhance sidewalk systems

Regional Plan – Othello is part of QUADCO

Funding – Grant monies for study. Construction grant and partnerships.

Individual letters of support – 114

Jurisdiction/Partners support – 4

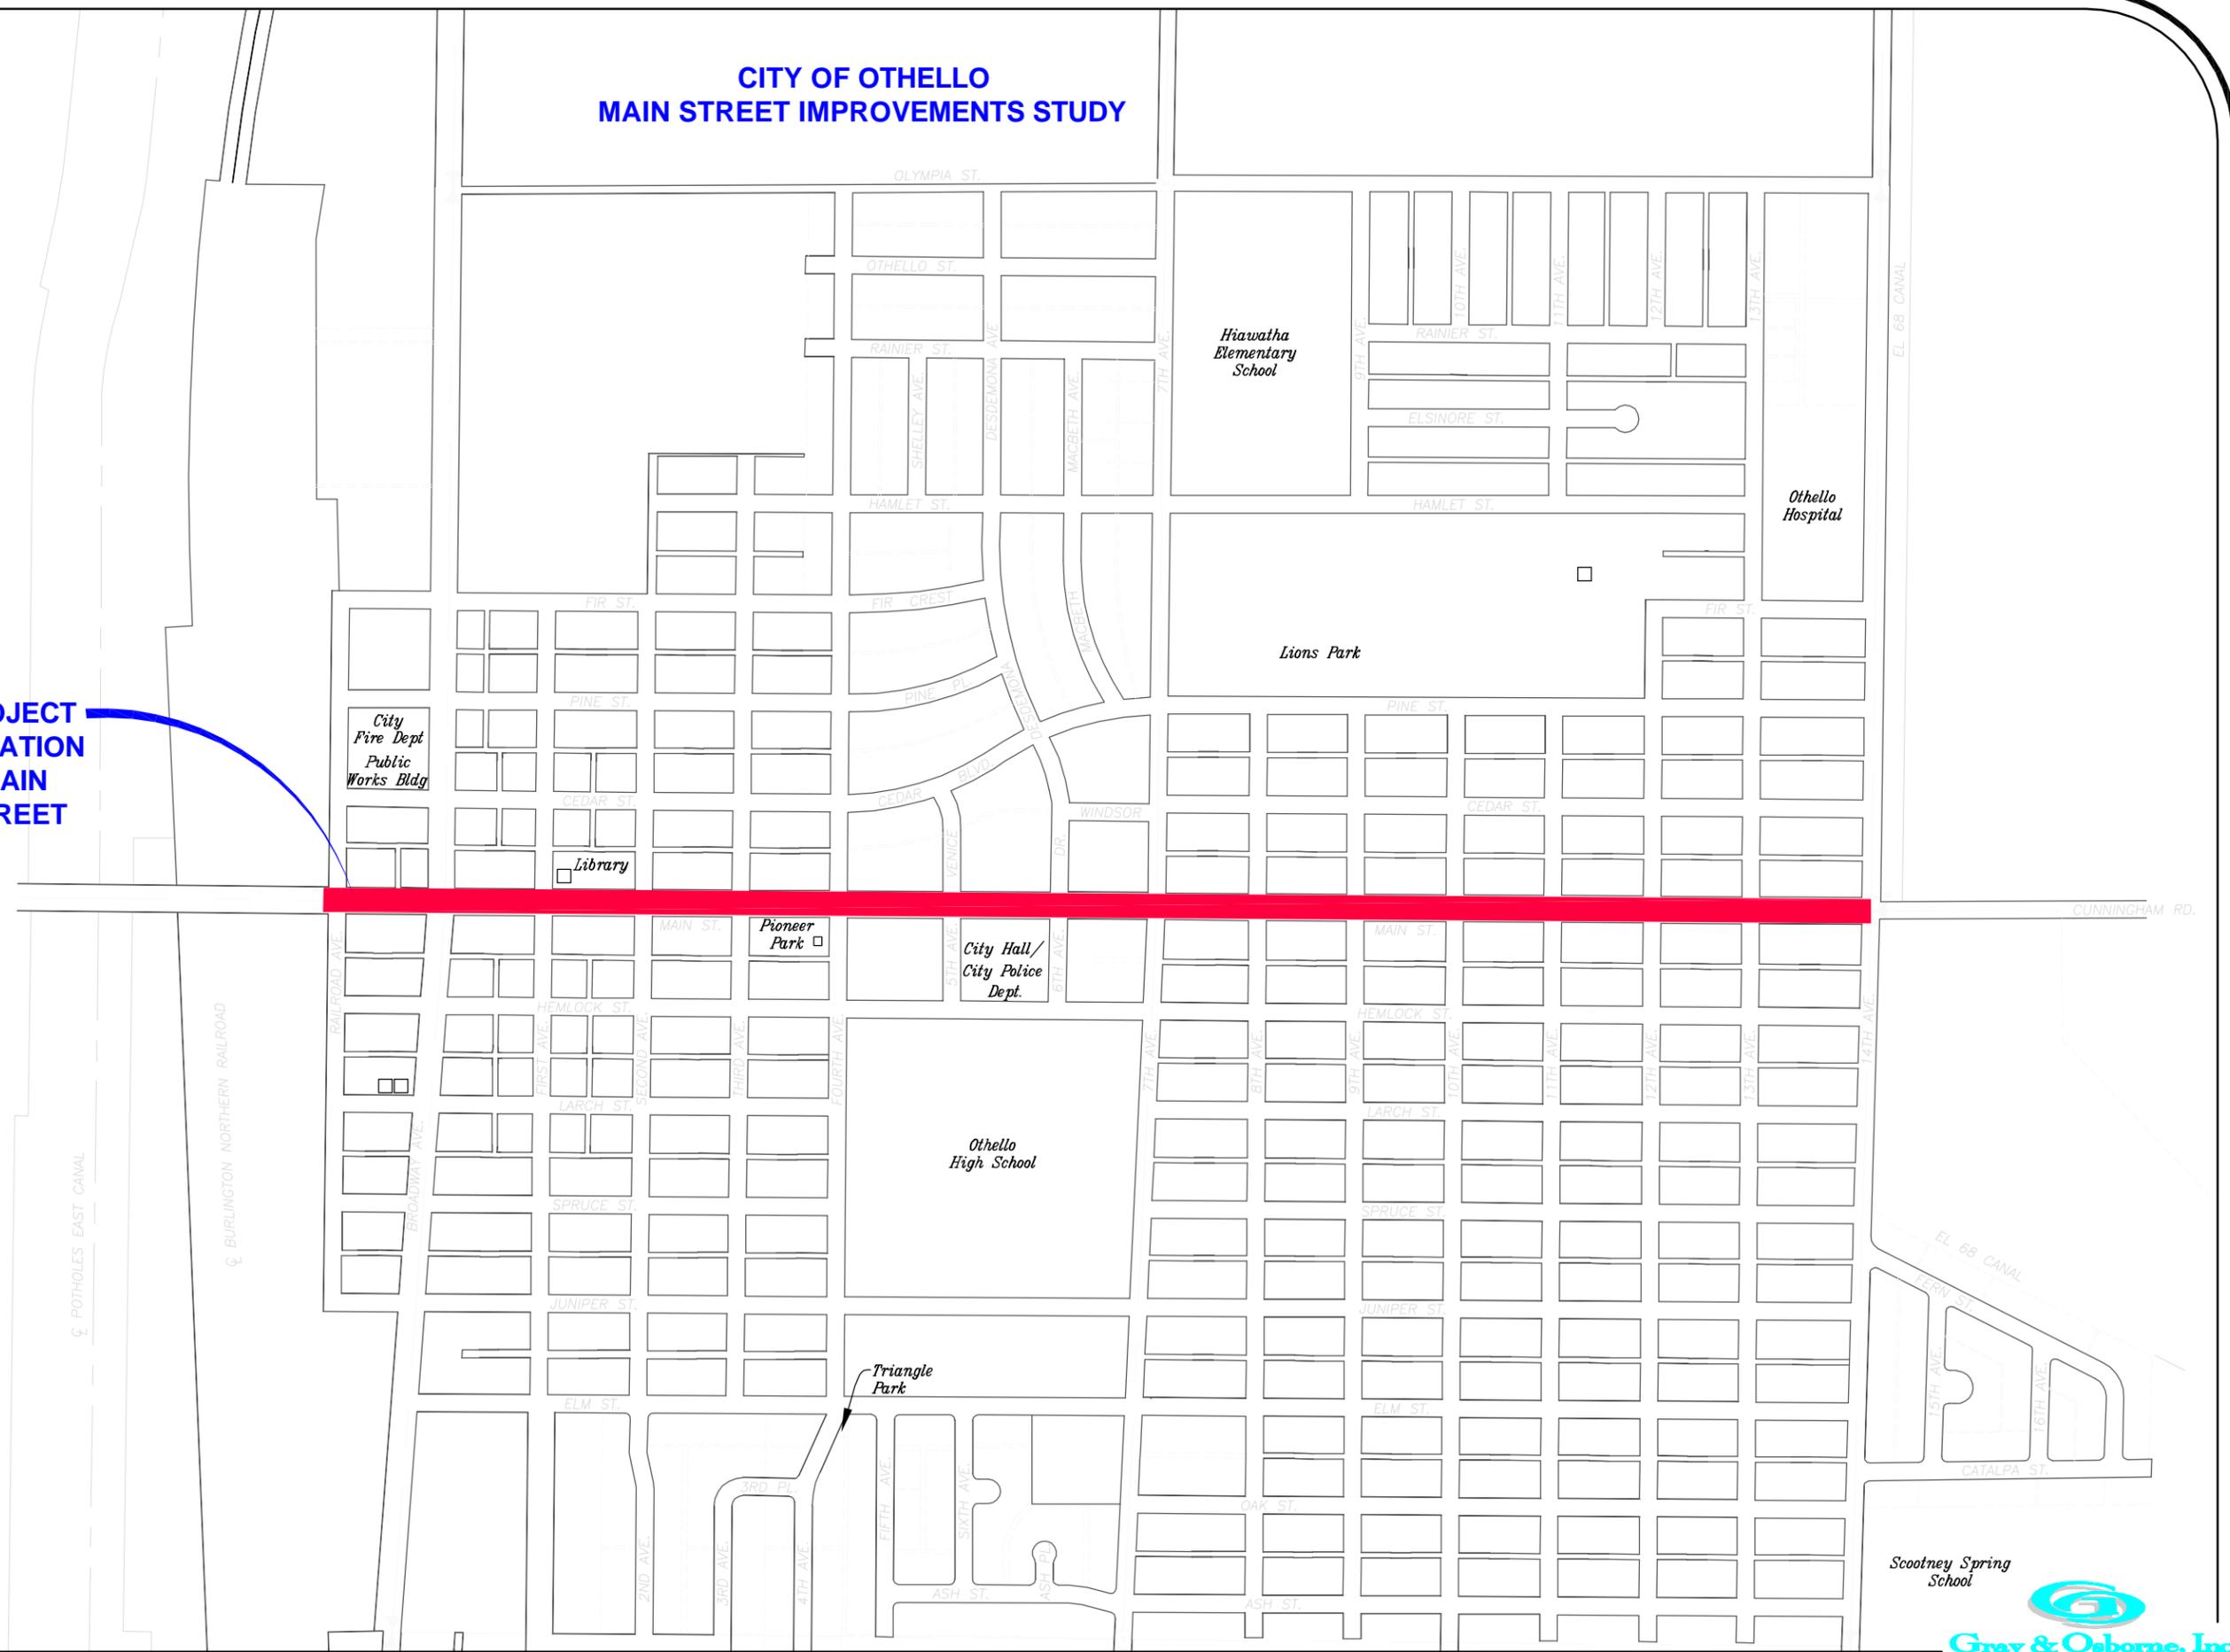

Community meetings held -14

# CITY OF OTHELLO MAIN STREET IMPROVEMENTS STUDY

**PROJECT  
LOCATION  
MAIN  
STREET**

March 10, 2011

Mr. David Heilman, Assistant Director  
Grant County Public Works  
124 Enterprise Street SE  
Ephrata, WA 98823

Reference: City of Othello Main Street Improvements

Dear Mr. Heilman:

The Port of Othello ("Port") is an enthusiastic supporter of the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for much needed safety and aesthetic improvements to Main Street.

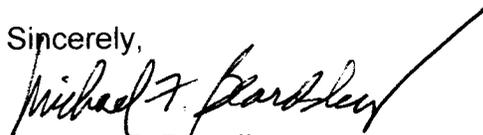

Our project began in 2009 with the process of planning, designing, and constructing improvements to Main Street that include updated infrastructure and an entire-width asphalt overlay. To be completed in the spring of 2011, Main Street will become a better business address and will attract more tourists and shoppers to our region.

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community. We are now ready for the next step in the planning process to make Main Street the attraction it needs to be in order to draw more people downtown, which will assist businesses to maintain jobs and hopefully provide enticement for new businesses to open in and along Main Street resulting in the creation of new jobs. The next step is to fund the planning process necessary to enhance a street made up entirely of asphalt and concrete by adding decorative lights, banners, and plantings in and along the sidewalks adjacent to Main Street.

This process was started by installing additional electrical conduits and water services all along Main Street, while it was under construction. The next step is to generate a plan, hence the need for the UPWP funds.

Thank you for your consideration. We need an economic "shot in the arm" to enhance the downtown corridor in the City of Othello. We look forward to your support.

Sincerely,

Michael F. Beardlsey  
Director

Development  
Council

Embracing Business.  
Growing Together.

425 East Main Street, Suite 300, Othello, WA 99344 (509) 331-2042

March 9, 2011

David Heilman  
Assistant Director  
Grant County Public Works  
124 Enterprise St. SE  
Ephrata, WA 98823

Dear Mr. Heilman,

Adams County Development Council fully supports the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for safety and aesthetic improvements to Othello's Main Street.

The City of Othello recently updated the entire width and mile long Main Street. This update includes new infrastructure, asphalt overlay, sidewalks and curbs, a project with its beginnings in 2009. Completion of this project is expected in April 2011. The City added additional electrical conduits and water services for future safety and beautification improvements during this construction.

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community and surrounding businesses. It is our hope, with funds provided by a UPWP Grant, the much needed lighting and beautification planning may begin. A lighted Main Street with a few aesthetic touches would become a place that entices new business, draws tourists, AND, will create new jobs.

We ask you to carefully consider this worthwhile project which will provide an economic boost to the growing City of Othello.

Thank you for your consideration,

Grace Shelby, Assistant Director  
Adams County Development Council

Craig Ulleland  
David Baumann  
Ehman Sheldon  
Mike Schrag

Reference: City of Othello Main Street Beautification Improvements

Dear Mr. Heilman:

Thank you for the opportunity to support the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for much needed aesthetic improvements to Main Street.

Since 2009, the City has been in the process of planning, designing, and constructing improvements to Main Street that include over 9,300 feet of storm sewer pipe, over 6,900 feet of water main, and an entire-width asphalt overlay the entire length of Main Street. When completed in the Spring of 2011, Main Street will become an attraction for residents frequenting the businesses in our central business district and a draw for tourists new to our region.

The City started the process of planning for the beautification of Main Street by installing approximately 2,700 feet of 3-inch electrical conduit for future street lighting and approximately 1,000 feet of 1-inch water service pipe and 22 water services for future decorative plantings while Main Street was under construction. These efforts were undertaken so that Main Street would not have to be torn up for future improvements after the new overlay was complete.

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community. In fact, we are ready for the next step in the planning process to make Main Street the attraction it needs to be in order to draw more people downtown, which will assist businesses to maintain jobs and provide enticement for new businesses to open in and along Main Street and create new jobs. This next step is the planning necessary to provide beautification to a street made up entirely of asphalt and concrete by adding decorative lights, banners, and plantings in and along the sidewalks adjacent to Main Street, hence the need for the UPWP funds.

Thank you for your consideration of this very worthwhile project to provide an economic "shot in the arm" and enhance the beauty of the downtown corridor in the City of Othello.

Sincerely,

Tim Wilson  
Mayor

Mr. David Heilman  
Assistant Director  
Grant County Public Works  
124 Enterprise Street, SE  
Ephrata, WA 98823

RE: City of Othello Main Street Beautification Improvements

Dear Mr. Heilman,

I am writing this letter in regards to the City of Othello's Main Street Beautification Project proposal. The overall goal of the proposed beautification project is not to simply improve the esthetics of our Main Street but improve the economy of our small community. Through this investment in our community's infrastructure the City of Othello hopes to realize increased support of local businesses and tourism.

As the CEO of Columbia Basin Health Association, located on Main Street, I have been very concerned with the deterioration of this road. Main Street is the city's primary arterial that connects the central business district to the industrial, commercial, and residential sectors of Othello while at the same time providing a farm-to-market route through the community. The City of Othello has leverage resources to repave Main Street and the preparatory engineering has been completed with water and electrical stub-outs, however more support is needed to complete the architectural and engineering needs of the Beautification project.

As our organization and community continues to grow we must maintain the quality of our towns infrastructure in order attract new businesses and residents. As the primary healthcare organization in the community we compete with the much larger surrounding communities to recruit high quality patient focused staff, with the deterioration of Main Street this task is an even bigger challenge. The restoration of Othello's Main Street is essential to our continued success.

On behalf of Columbia Basin Health Association, we are pleased to support the City of Othello's Main Street Beautification Improvement project. Thank you for your consideration of this very worthwhile project.

Sincerely,

A handwritten signature in black ink, appearing to read 'Greg Brandenburg', with a long horizontal flourish extending to the right.

Greg Brandenburg, CEO  
Columbia Basin Health Association

Re: City of Othello Main Street Beautification Improvements

I want to express my support for the City of Othello Main Street Beautification Project. The beautification of Main Street will have a significant impact esthetically, but a much larger impact is economical. Business will benefit, tourism will benefit and growth will benefit. The preparatory engineering has been completed with water and electrical stub-outs during our six million dollar repaving project.

Please, assist the City's efforts by awarding funding for a study that will identify the architectural and engineering needs of the project.

Reference: City of Othello Main Street Beautification Improvements

Dear Mr. Heilman:

Thank you for the opportunity to support the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for much needed aesthetic improvements to Main Street.

Since 2009, the City has been in the process of planning, designing, and constructing improvements to Main Street that include over 9,300 feet of storm sewer pipe, over 6,900 feet of water main, and an entire-width asphalt overlay the entire length of Main Street. When completed in the Spring of 2011, Main Street will become an attraction for residents frequenting the businesses in our central business district and a draw for tourists new to our region.

The City started the process of planning for the beautification of Main Street by installing approximately 2,700 feet of 3-inch electrical conduit for future street lighting and approximately 1,000 feet of 1-inch water service pipe and 22 water services for future decorative plantings while Main Street was under construction. These efforts were undertaken so that Main Street would not have to be torn up for future improvements after the new overlay was complete.

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community. In fact, we are ready for the next step in the planning process to make Main Street the attraction it needs to be in order to draw more people downtown, which will assist businesses to maintain jobs and provide enticement for new businesses to open in and along Main Street and create new jobs. This next step is the planning necessary to provide beautification to a street made up entirely of asphalt and concrete by adding decorative lights, banners, and plantings in and along the sidewalks adjacent to Main Street, hence the need for the UPWP funds.

Thank you for your consideration of this very worthwhile project to provide an economic "shot in the arm" and enhance the beauty of the downtown corridor in the City of Othello.

Sincerely,

Reference: City of Othello Main Street Beautification Improvements

Dear Mr. Heilman:

Thank you for the opportunity to support the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for much needed aesthetic improvements to Main Street.

Since 2009, the City has been in the process of planning, designing, and constructing improvements to Main Street that include over 9,300 feet of storm sewer pipe, over 6,900 feet of water main, and an entire-width asphalt overlay the entire length of Main Street. When completed in the Spring of 2011, Main Street will become an attraction for residents frequenting the businesses in our central business district and a draw for tourists new to our region.

The City started the process of planning for the beautification of Main Street by installing approximately 2,700 feet of 3-inch electrical conduit for future street lighting and approximately 1,000 feet of 1-inch water service pipe and 22 water services for future decorative plantings while Main Street was under construction. These efforts were undertaken so that Main Street would not have to be torn up for future improvements after the new overlay was complete.

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community. In fact, we are ready for the next step in the planning process to make Main Street the attraction it needs to be in order to draw more people downtown, which will assist businesses to maintain jobs and provide enticement for new businesses to open in and along Main Street and create new jobs. This next step is the planning necessary to provide beautification to a street made up entirely of asphalt and concrete by adding decorative lights, banners, and plantings in and along the sidewalks adjacent to Main Street, hence the need for the UPWP funds.

Thank you for your consideration of this very worthwhile project to provide an economic "shot in the arm" and enhance the beauty of the downtown corridor in the City of Othello.

Sincerely,

*Letty*

Re: City of Othello Main Street Beautification Improvements

I want to express my support for the City of Othello Main Street Beautification Project. The beautification of Main Street will have a significant impact esthetically, but a much larger impact is economical. Business will benefit, tourism will benefit and growth will benefit. The preparatory engineering has been completed with water and electrical stub-outs during our six million dollar repaving project.

Please, assist the City's efforts by awarding funding for a study that will identify the architectural and engineering needs of the project.

Reference: City of Othello Main Street Beautification Improvements

Dear Mr. Heilman:

Thank you for the opportunity to support the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for much needed aesthetic improvements to Main Street.

Since 2009, the City has been in the process of planning, designing, and constructing improvements to Main Street that include over 9,300 feet of storm sewer pipe, over 6,900 feet of water main, and an entire-width asphalt overlay the entire length of Main Street. When completed in the Spring of 2011, Main Street will become an attraction for residents frequenting the businesses in our central business district and a draw for tourists new to our region.

The City started the process of planning for the beautification of Main Street by installing approximately 2,700 feet of 3-inch electrical conduit for future street lighting and approximately 1,000 feet of 1-inch water service pipe and 22 water services for future decorative plantings while Main Street was under construction. These efforts were undertaken so that Main Street would not have to be torn up for future improvements after the new overlay was complete.

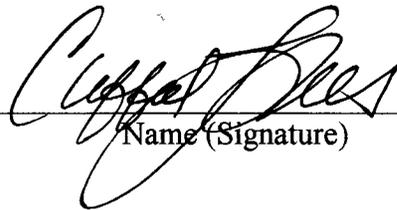

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community. In fact, we are ready for the next step in the planning process to make Main Street the attraction it needs to be in order to draw more people downtown, which will assist businesses to maintain jobs and provide enticement for new businesses to open in and along Main Street and create new jobs. This next step is the planning necessary to provide beautification to a street made up entirely of asphalt and concrete by adding decorative lights, banners, and plantings in and along the sidewalks adjacent to Main Street, hence the need for the UPWP funds.

Thank you for your consideration of this very worthwhile project to provide an economic "shot in the arm" and enhance the beauty of the downtown corridor in the City of Othello.

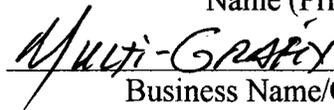

Sincerely,

I want to express my support for the City of Othello Main Street Beautification Project. The beautification of Main Street will have a significant impact esthetically, but a much larger impact is economical. Business will benefit, tourism will benefit and growth will benefit. The preparatory engineering has been completed with water and electrical stub-outs during our six million dollar repaving project.

Please, assist the City's efforts by awarding funding for a study that will identify the architectural and engineering needs of the project.

Reference: City of Othello Main Street Beautification Improvements

Dear Mr. Heilman:

Thank you for the opportunity to support the City of Othello's application to QUADCO for a UPWP Transportation Planning Grant for much needed aesthetic improvements to Main Street.

Since 2009, the City has been in the process of planning, designing, and constructing improvements to Main Street that include over 9,300 feet of storm sewer pipe, over 6,900 feet of water main, and an entire-width asphalt overlay the entire length of Main Street. When completed in the Spring of 2011, Main Street will become an attraction for residents frequenting the businesses in our central business district and a draw for tourists new to our region.

The City started the process of planning for the beautification of Main Street by installing approximately 2,700 feet of 3-inch electrical conduit for future street lighting and approximately 1,000 feet of 1-inch water service pipe and 22 water services for future decorative plantings while Main Street was under construction. These efforts were undertaken so that Main Street would not have to be torn up for future improvements after the new overlay was complete.

The efforts of the City to reconstruct this major arterial have been widely appreciated by the community. In fact, we are ready for the next step in the planning process to make Main Street the attraction it needs to be in order to draw more people downtown, which will assist businesses to maintain jobs and provide enticement for new businesses to open in and along Main Street and create new jobs. This next step is the planning necessary to provide beautification to a street made up entirely of asphalt and concrete by adding decorative lights, banners, and plantings in and along the sidewalks adjacent to Main Street, hence the need for the UPWP funds.

Thank you for your consideration of this very worthwhile project to provide an economic "shot in the arm" and enhance the beauty of the downtown corridor in the City of Othello.

Sincerely,
