Description

This shapefile has been joined to the Assessment Roll Year (AARollYear) table, and therefore contains the attributes of AARollYear, such as assessed values, owner names and addresses, appraisal neighborhoods, and land use codes.

Because the cardinality is one-to-many, you must use a relationship class or relate to connect to the tables containing parcel attributes. The tables are available as a Microsoft Access database, or within the file geodatabase version of the parcel polygons. Relationship classes are included with the file geodatabase.
