

Feature Class Name

Urban Growth Area

Summary

Polygons representing Grant County, Washington, Urban Growth Area boundaries.

Description

One of the first steps in the implementation of the Growth Management Act (GMA) is for counties and their cities to designate urban growth areas (UGAs), “within which urban growth shall be encouraged, and outside of which growth can occur only if it is not urban in nature.” RCW 36.70A.110 and WAC 365-195-335 provide clear criteria for designating urban growth boundaries around a city or a group of cities.

Each urban growth area in a county should include enough land to accommodate the Washington State Office of Financial Management’s 20-year population projection allocated for that UGA. The UGA should also include adequate land for industrial and commercial activities, open space, and other public facilities. A land capacity analysis should be conducted to determine if there is sufficient land included in the UGA for all these uses. A market factor can be built in to this analysis to compensate for the fact that only a portion of the land will be available for sale and development over the planning period.

Within the UGA, a city and/or county is to designate sufficient open space, provide urban services, and permit development at urban densities. Urban development and provision of urban services, such as water and sewer, should not generally occur outside of urban growth areas.

RCW 36.70A.130(3) requires counties and cities to review, at least every ten years, designated UGAs, the densities permitted within each UGA, and the nature of development that has occurred. UGAs and comprehensive plans are to be revised to accommodate the urban growth projected for the succeeding twenty-year period.

Access and use limitations

This data should not be construed as legal advice or legal opinion on any specific facts or circumstances. The contents are intended for general information purposes only, and you are urged to consult your own lawyer concerning your own situation and any specific questions you may have.

Infrastructure records, drawings, and other documents have been gathered over many decades, using differing standards for quality control, documentation and verification. All of the data provided represents current information in a readily available format. While the data is generally believed to be accurate, occasionally it proves to be incorrect; thus its accuracy is not warranted. Prior to making any

property purchases or investments based in full or in part upon the material provided, it is specifically advised that you independently field verify the information contained in county records.

Fields

UGA_Name

The name of the urban area the Urban Growth boundary applies to.

Note: Electric City Ordinance No. 437 (2010), Snyder Annexation, extends into the Grand Coulee Urban Growth Area, and therefore the incorporated city boundary does not match the UGA boundary.

Last update

10/12/2018. Reshaped shared edge between Soap Lake and Lakeview to better follow parcel boundary lines.

7/5/2018. Reshaped Coulee Dam UGA to match incorporated city limits.

9/21/2017.

8/23/2016.

12/3/2014. Field UrbanAreaName changed to UGA_Name.

Update frequency

Annually, if change applications are approved. Urban Growth Area boundary changes are coincident with Comprehensive Plan land use designation changes. Applications for change are due March 31st of each year. Approved changes are implemented following the Board of County Commissioners public hearing and decision, usually held in July.
