

Prior to Permit Issuance

After you have submitted your application packet and we have accepted and routed for plan review, the application submittal is valid for a period of 6 months. We allow a one-time extension of an additional 6 months. Any applications in review pending after the year will be voided.

After Permit Issuance

Since January 1, 2009, Building Permits issued under non-enforcement circumstances have been issued for a term of 3 years. All work and inspections must be completed within 3 years from the date of issuance. Any work or inspections pending after 3 years will require an additional finish permit. The Finish permit project review will be based on codes current at the time of new issuance for work uninspected and unapproved. Fees to finish will also be based on an adjusted amount per the current fee schedule for the amount of work not previously inspected.

THE TERM IS

Code Enforcement

The Building Official coordinates with the Sheriff's Office to review each enforcement situation on a case-by-case basis to determine the permit term required for the scope of work needed to correct the situation. For more information on enforcement, contact our code enforcement unit (509) 762-1160 or visit the Website
