

Tiny Homes

WA State Labor and Industry (L&I) has the jurisdiction over [Tiny Homes](#). The Tiny Home should have a label issued by L&I. The identifying label may indicate RV. L&I has several [identifying labels](#).

If the label indicates “Recreational Vehicle” then the County would not permit the structure. You may need to obtain permission/approvals from the park or property owner. **You may want to talk with the [Planning Department](#) to make sure zoning allows for RV placement on the property.**

If the label indicates a manufactured home, modular home, mobile home then a permit is required. If you want to build a Tiny Home, then you will need to meet 2018 IRC standards for a residence. **You may want to talk with the [Planning Department](#) prior to submitting for a permit to make sure there will not be additional requirements or restrictions based on size or zoning.**
